

Ticket ID	Alert Message	Severity	Details	Ticket status
A-2703	SERVER-MAIL Phishing attempt possible download of malware	Medium	The user may have opened a malicious email and opened attachments or clicked links.	Escalated ▾

Ticket comments
The ticket was escalated to a SOC II analyst because based on the evidence it was an email phishing attack. The email contained a mismatch of identity in the sender's email and name, grammatical errors, and a suspicious link that the playbook identified as malicious and should be escalated.
